

Gunjan Singh Dwijendra Singh Pawar

Full Stack Developer

gunjansinghpawar@gmail.com | +91 6356316676 | Ahmedabad,Gujarat,India | gunjansinghpawar

Summary

Full Stack Developer with practical experience in designing, developing, and deploying scalable web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Proficient in creating responsive and high-performance user interfaces, developing secure RESTful APIs, implementing authentication and authorization systems, and managing optimized database structures. Experienced in working with JavaScript, TypeScript, Redux Toolkit, Tailwind CSS, Git, and cloud-based services such as Cloudinary and Firebase.

Worked on multiple real-world projects including e-commerce platforms, AI-powered chatbot applications, real estate management systems, and SaaS-based web solutions with a strong focus on clean architecture, reusable components, performance optimization, and user experience. Adept at problem-solving, debugging, and collaborating in fast-paced development environments while following modern development standards and agile workflows. Passionate about learning emerging technologies, building impactful digital products, and continuously improving technical and professional skills.

Professional Experience

Full Stack Developer, Codnestx	11/2025 – Present
- Developed and optimized full-stack web applications using React.js, Next.js, Node.js, and MongoDB. - Built responsive and reusable frontend components with focus on clean UI and better user experience. - Integrated REST APIs and managed backend functionalities including authentication and database operations. - Collaborated with the development team to implement new features, fix bugs, and improve application performance. - Worked with Git and modern development workflows while following scalable coding standards and best practices.	Ahmedabad,GJ
Full Stack Developer, ApnaWebX	06/2025 – 11/2025
- Developed and maintained full-stack web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. - Built responsive and user-friendly frontend interfaces with focus on performance and cross-device compatibility. - Designed and integrated RESTful APIs for seamless communication between frontend and backend systems. - Implemented authentication, authorization, and secure user management features using JWT and role-based access control. - Worked on database design, schema optimization, and efficient data handling in MongoDB. - Collaborated with team members to develop scalable features and improve overall application performance. - Integrated third-party services and cloud-based solutions including image storage and payment gateways.	Ahmedabad,GJ
Full Stack Developer Intern, Codage Habitation	02/2025 – 06/2025
- Assisted in developing full-stack web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. - Built responsive and reusable frontend components with focus on modern UI/UX design and performance optimization. - Worked on backend API integration, authentication systems, database operations, and server-side functionality. - Collaborated with the development team to debug issues, implement new features, and improve application scalability. - Gained hands-on experience with Git, REST APIs, cloud integrations, and real-world agile development workflows.	Ahmedabad,GJ

Education

Bachelor of Computer Applications (BCA), Sardar Vallabhbhai Global University (SVGU)

06/2023 – 03/2026

Ahmedabad,GJ

Bachelor of Computer Applications (BCA) graduate from Sardar Vallabhbhai Global University with a strong foundation in software development, web technologies, database management, and programming concepts. Gained practical knowledge in full-stack development through academic projects and hands-on experience with technologies such as React.js, Node.js, MongoDB, JavaScript, and modern web frameworks. Actively worked on real-world projects including e-commerce platforms, AI-based applications, and scalable web systems, enhancing problem-solving, teamwork, and technical skills.

Projects

Gunjan Elite Store , Modern E-Commerce Web Application | Next.js Based Project

01/2026 – 01/2026

Developed a modern e-commerce web application named Gunjan Elite Store using Next.js, React.js, JavaScript, Tailwind CSS, and local storage for data management and user session handling. Designed and built responsive product pages, category sections, shopping cart functionality, wishlist features, and dynamic UI components with focus on smooth user experience and clean interface design. Implemented client-side state management, product filtering, cart persistence using local storage, responsive layouts, and optimized frontend performance without using a backend service. Focused on reusable component architecture, mobile responsiveness, fast navigation, and modern UI/UX practices to create a scalable and visually appealing online shopping experience. Familiar with frontend optimization, routing, component-based development, and local storage data handling for lightweight web applications.

Medico Ai , AI-Powered Healthcare Assistant | Full Stack Web Application

06/2025 – 12/2025

Developed an AI-powered healthcare chatbot application named Medico AI designed to provide users with instant health-related assistance, symptom guidance, and interactive medical support through a smart conversational interface. Built the application using the MERN stack including React.js, Node.js, Express.js, and MongoDB with a responsive and modern user interface for seamless user experience across devices.

Implemented secure authentication systems, chatbot interaction handling, REST API integration, dynamic user sessions, and efficient database management for storing user queries and responses. Integrated AI-based response generation and intelligent conversation flow to improve user interaction and healthcare accessibility. Focused on scalable architecture, responsive UI/UX, clean code structure, performance optimization, and real-time user interaction features while following modern full-stack development practices.

Gunjan Academy , Online Learning Platform | Educational Web Application

10/2025 – 10/2025

Developed a modern educational web platform named Gunjan Academy using Next.js, React.js, JavaScript, and Tailwind CSS with a responsive and user-friendly interface for online course management and learning accessibility. Designed interactive landing pages, course sections, navigation systems, responsive layouts, and engaging UI components focused on improving user experience across desktop and mobile devices.

Implemented dynamic frontend functionalities including course listings, responsive navigation menus, smooth scrolling sections, reusable component architecture, and optimized page performance. Focused on modern UI/UX design principles, clean code structure, fast-loading pages, and scalable frontend development practices to create a professional and visually appealing e-learning platform. Familiar with responsive web design, frontend optimization, component-based architecture, and deployment workflows for modern educational applications.

Skills

- **MERN Stack Development** — Experienced in MERN Stack Development with strong knowledge of MongoDB, Express.js, React.js, and Node.js for building scalable full-stack web applications. Skilled in Frontend Development using React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, and responsive UI/UX design. Proficient in Backend Development including REST API development, authentication and authorization using JWT, role-based access control, middleware handling, server-side architecture, and database management. Familiar with Redux Toolkit, Context API, API integration, state management, form handling, and performance optimization techniques.
- **Frontend Development** — Proficient in Frontend Development with strong expertise in building modern, responsive, and user-friendly web applications using React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, and Bootstrap. Experienced in creating reusable components, dynamic user interfaces, responsive layouts, dashboard systems, and interactive web pages with focus on performance optimization and clean UI/UX design. Skilled in state management using Redux Toolkit and Context API, API integration, form validation, routing, component-based architecture, and frontend performance enhancement techniques. Familiar with Framer Motion, animations, responsive design principles, cross-browser compatibility, SEO-friendly development, and scalable frontend project structures for enterprise-level applications.
